

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

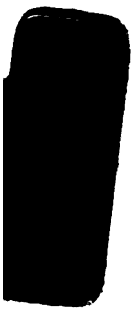

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

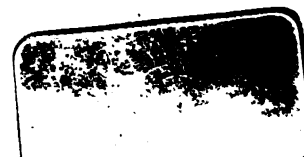

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

PARISH OF SELSTON

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ound, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, ch is very approximately equal to one square inch to one acre, the square of 018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each et is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (⌠) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the unty Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, area is twenty-four square miles, equal to 15,360 acres.

e following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

here a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; i the case of towns and large villages encircled by a red band, one number and area onl are given for the portion within the red band, unless they are contained in more tha one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosur except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, whi does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perch multiply the decimal first by 4 and then by 40, preserving the same number of decim in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF ENGLAND

PARISH OF SKEGBY

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (⎰) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities { ROMAN / Britidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain ...	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*
Undefined	*Und.*		

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.
C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.
C. S. L. W. Centre of Stream at Low Water.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.
C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.
C. S. L. W. Centre of Stream at Low Water.
C. Tk. F. Centre of Track of Fence, Furrow, &c.
F. S. F. Face of Sunk Fence.
F. S. W. Face of Sea Wall, or Sunk Wall.
F. W. - Face of Wall.
Tk. D. - Track of Ditch or Drain.
Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.
C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.
C. S. L. W. Centre of Stream at Low Water.
C. Tk. F. Centre of Track of Fence, Furrow, &c.

F. S. W. Face of Sea Wall, or Sunk Wall.
F. W. - Face of Wall.
Tk. D. - Track of Ditch or Drain.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.
C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.
C. S. L. W. Centre of Stream at Low Water.
C. Tk. F. Centre of Track of Fence, Furrow, &c.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book the case of towns and large villages encircled by a red band, one number and area c are given for the portion within the red band, unless they are contained in more t one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosu except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, wl does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and no the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perch multiply the decimal first by 4 and then by 40, preserving the same number of decim in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book the case of towns and large villages encircled by a red band, one number and area are given for the portion within the red band, unless they are contained in more one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclo except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Per multiply the decimal first by 4 and then by 40, preserving the same number of deci in the product.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.
C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.
C. S. L. W. Centre of Stream at Low Water.
C. Tk. F. Centre of Track of Fence, Furrow, &c.
F. S. F. Face of Sunk Fence.
F. S. W. Face of Sea Wall, or Sunk Wall.
F. W. - Face of Wall.
Tk. D. - Track of Ditch or Drain.
Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

PARISH OF STRELLEY

NOTTINGHAMSHIRE

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ound, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, ch is very approximately equal to one square inch to one acre, the square of 018 inch being equal to one acre.

he length of each sheet is 1½ miles, and the breadth 1 mile, the area of each t is therefore 960 acres.

ch enclosure has a reference number to the area which is given in this Book; e case of towns and large villages encircled by a red band, one number and only are given for the portion within the red band, unless they are contained re than one parish, in which case a number is given for the portion included h parish.

e Braces [⌒] on the plans are to indicate that the spaces so braced are in- d under the same reference number.

e Altitudes in feet above the Mean Level of the Sea are written thus —*31·4*.

e Scale of the County Plans is 6 inches to a mile, and each sheet contains eets of the Parish Plans. There is therefore a double reference number to sheet of the Parish Plans, as VI. 9., the first number referring to the County , the second number to the Parish Plans.

e dimensions of the sheets on the Six-inch scale being four miles by six miles, rea is twenty-four square miles, equal to 15,360 acres.

e following are the characters employed on the Ordnance Plans on the Scales -2500, and 6 inches to a mile :—

1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, does not follow the centre of the fence, the area is calculated to the Parish or other boundary, not to the centre.

INDEX TO THE SHEETS

Published on the Scale of 2500 or 25·344 Inches to a Mile

EXPLANATORY REMARKS

e scale of the Parish Plans is the 1-2500th of the actual length on the d, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, is very approximately equal to one square inch to one acre, the square of 8 inch being equal to one acre.

e length of each sheet is 1½ miles, and the width 1 mile, the area of each is therefore 960 acres.

ch enclosure has a reference number to the area which is given in this Book.

e Braces (*f*) on the plans are to indicate that the spaces so braced are in- d under the same reference numbet.

e Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

e Scale of the Plans of the County is 6 inches to a mile, and each sheet con- the same area as 16 sheets of the Parish Plans. There is therefore a double nce number to each sheet, as VI. 9., the Roman Numerals referring to the y Plans, the Arabic Figures to the Parish Plans.

e dimensions of the sheets on the Six-inch scale being four miles by six miles, ea is twenty-four square miles, equal to 15,360 acres.

ollowing are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF ENGLAND

PARISH OF TEVERSALL

NOTTINGHAMSHIRE

EXPLANATORY REMARKS

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 7·918 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces () on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Churches	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities { ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	C.S.	Centre of Fence	C.F.
Centre of Road	C.R.	Top of Cop	T.C.
Side of Stream or Drain ...	S.S. or S.D.	Centre of Wall	C.W.
Edge of Hedge	R.H.	Defaced	Def.
Face of Wall	F.W.	Track of Stream	T.S.
Undefined	Und.		

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.
C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.
C. S. L. W. Centre of Stream at Low Water.
C. Tk. F. Centre of Track of Fence, Furrow, &c.

F. S. W. Face of Sea Wall, or Sunk Wall.
F. W. - Face of Wall.
Tk. D. - Track of Ditch or Drain.
Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.
C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.
C. S. L. W. Centre of Stream at Low Water.
C. Tk. F. Centre of Track of Fence, Furrow, &c.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book: the case of towns and large villages encircled by a red band, one number and area o are given for the portion within the red band, unless they are contained in more th one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosu except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, wh does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and no the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perch multiply the decimal first by 4 and then by 40, preserving the same number of decim in the product.

ORDNANCE SURVEY OF ENGLAND

PARISH OF TROWELL

EXPLANATORY REMARKS

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the breadth 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The Braces [⌒] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus —*31·4*.

The Scale of the County Plans is 6 inches to a mile, and each sheet contains 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet of the Parish Plans, as VI. 9., the first number referring to the County Plans, the second number to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	H
Parishes, Ancient or Mother.....	P	Civil Parishes or Townships	T
Extra Parochial	E	Division of Townships	T

Municipal Wards.....W

Antiquities { ROMAN / Britical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain ...	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream.....	*T.S.*

Undefined..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases :—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.

ALTITUDES.

The Altitudes are given in feet above the Approximate Mean Water at Liverpool. Those indicated thus (↑B.M.574) refer to marks made on Buildings, Walls, &c.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ABBREVIATIONS.

Abbreviations in use on the Ordnance Plans to show the nature of the Boundaries, also for various objects, and Descriptive Names.

These Abbreviations are used either singly or in combination, thus—

B. B. - Bottom or Base of Bank.
C. C. D. Centre of Covered Ditch or Drain.
C. H. - Centre of Hedge, Harbour, &c.
C. O. C. - Centre of Old Channel, Canal, Cut, &c.
C. S. L. W. Centre of Stream at Low Water.
C. Tk. F. Centre of Track of Fence, Furrow, &c.
F. S. F. Face of Sunk Fence.
F. S. W. Face of Sea Wall, or Sunk Wall.
F. W. - Face of Wall.
Tk. D. - Track of Ditch or Drain.
Tk. S. - Track of Stream.

Where an Initial represents several kinds of features the correct feature intended can easily be identified by anyone visiting the ground; thus on the ground C. R. along a road cannot be taken to mean "Centre of River."

AREAS.

Each enclosure has a reference number to the area which is given in this Book; in the case of towns and large villages encircled by a red band, one number and area only are given for the portion within the red band, unless they are contained in more than one parish, in which case a number is given for the portion included in each parish.

The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases:—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.
